WORK EXPERIENCE

React Developer

📅 Oct 2022

- Built responsive and interactive user interfaces using HTML5, CSS3, and JavaScript, ensuring a seamless experience across devices. Developed and optimized responsive web pages, increasing mobile user engagement by 15
- Enhanced mobile responsiveness through the implementation of CSS media queries and advanced styling techniques.
- Designed dynamic and reusable UI components using JavaScript and React, improving development efficiency.
- Integrated more than 300+ Rest APIs into the project
- Integrated payment gateways including Cashfree, Getepay, and 3rd party APIs for functionalities such as PAN verification, bank verifications, eNACH, and payment gateways.
- Developed responsive web pages using HTML, CSS, and JavaScript, resulting in a 15 percent boost in mobile user engagement .
- Successfully handled state management of the application using Redux, improving performance and reducing load time by around 20 percent.
- Utilized React Router for handling client-side routing and navigation within the application.
- ptimized application performance by implementing React Context API, resulting in a 15 percent decrease in rendering time, enhancing user experience and responsiveness.
- Implemented Redux for state management, handling asynchronous apis logic in Redux-Thunk
- Contributed to production changes by resolving Jira stories and bugs, making them release-ready.
- Implemented media queries to increase mobile responsiveness by 15 percent for mobile users
- Followed agile software development methodologies.
- Implemented SEO methods to increase the SEO ranking of the Web site,
- Tech Stack: HTML5, CSS3, JavaScript, React, Redux,Redux Thunk, RTL, Jest, Bootstrap5, Ant Design, Material UI, Google Charts, Chart.js, Apex charts.

LANDING PAGE

📅 Oct 2022   📍 oxyloans

- OxyLoans: Developed a comprehensive web application for a P2P lending company, enabling seamless user interaction, real-time data management, and secure transactions.
- OxyBricks: Engineered a robust platform for a fractional investment company, providing users with intuitive navigation and dynamic data visualization features.

- Askoxy.ai: Developed an AI-driven web application designed to deliver intelligent and interactive user experiences, leveraging advanced features of React.js and AI APIs

SKILLS

React Developer

📅 Oct 2022

Frontend Development: Proficient in creating responsive and interactive user interfaces using React.js, JavaScript (ES6+), HTML5, and CSS3.

React Ecosystem: Experienced with React Router, Redux, Context API, and managing global state for scalable applications.

Component Design: Skilled in building reusable and modular components with React Hooks like useState, useEffect, and useReducer.

Styling Frameworks: Adept at using Tailwind CSS, Material-UI (MUI), and CSS-in-JS libraries such as Styled Components for clean and maintainable UI design.

Version Control: Experienced with Git and platforms like GitHub and GitLab for collaborative development and code versioning.
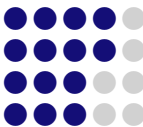

Testing: Knowledgeable in Jest, React Testing Library, and Cypress for writing unit and integration tests.

State Management: Expertise in managing application state using tools like Redux Toolkit and React Query.

Performance Optimization: Skilled in optimizing React applications using lazy loading, code splitting, and memoization techniques.

LIBRARIES

REDUX & THUNK
JQUERY & AXIOS
BOOTSTRAPE & ANT
MUI & TAILWIND
